**Course Goals**

This course is designed to provide an opportunity for local pastors to strengthen their knowledge of basic doctrines of the Christian faith and to help them to refine their skills in theological reflection with an eye toward deepening students' understanding of how Christian doctrines inform and shape life both inside and outside the community of faith.

**Course Objectives**

The following objectives are intended to help students attain these goals:

- to experience a sustained discussion of basic Christian doctrines;
- to learn some of the historical background that lead to the development of Christian doctrines;
- to practice the art of theological reflection by responding to questions designed to enable one to establish how doctrine shapes the life of the congregation; and
- to gain further understanding of the relationship of doctrine to concrete experiences that challenge persons of faith.

It is expected that at the end of the course students will have developed a deeper understanding of some of the central doctrines of the Christian faith and will have refined their skill in theological reflection to enable them to clarify the theology which governs their ministry endeavors.
